Sign-in states

The welcome screen keeps one centered column in every state. Only the button and the line under it change.

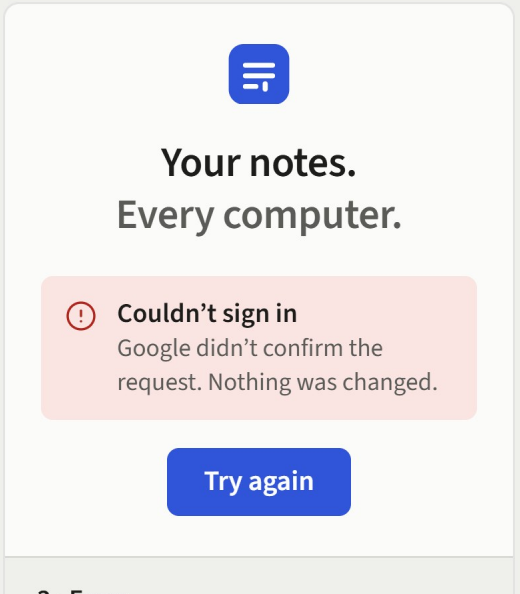

1 · Ready

Opens the Google sign-in page in the default browser. Focus lands on the button, so Enter is all it takes.

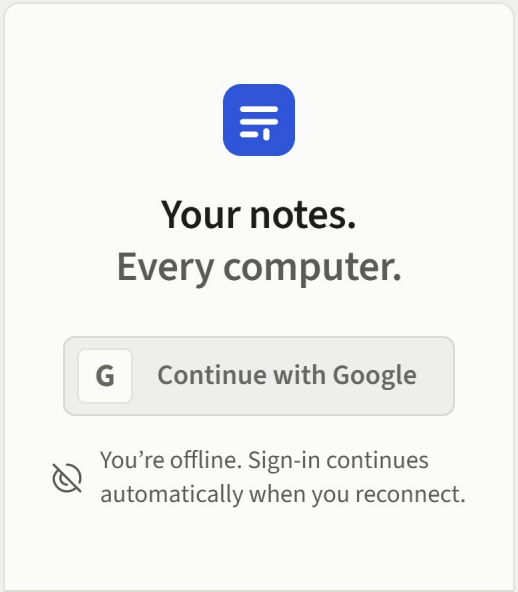

2 · Waiting

Button is disabled and shows a spinner. Cancel returns to Ready. Times out after 5 minutes.

3 · Error

Inline message above the button, never a modal. The button becomes “Try again”, and the message is announced to screen readers.

4 · Offline on first launch

Sign-in needs the internet. The button is disabled, and it enables itself the moment Windows reports a connection.

Product sync — Mon 12 Oct

Attendees: Mara, Jonas, Tess

Decisions
- Ship the beta to 50 users on Thursday
- Pricing page copy goes to review Wednesday
- Revisit onboarding after the first week of feedback

Action items
[ ] Mara send the beta invite list
[ ] Jonas fix the export bug (#214)
[ ] Tess draft release notes

Notes sidebar states

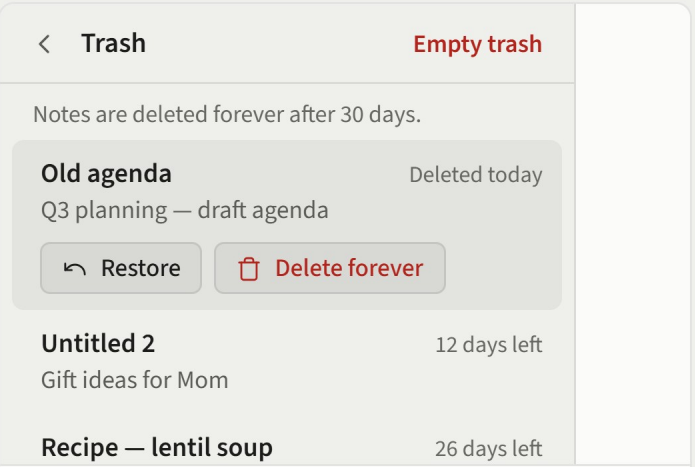

Each panel is the real 288 px sidebar, shown beside a sliver of the editor.

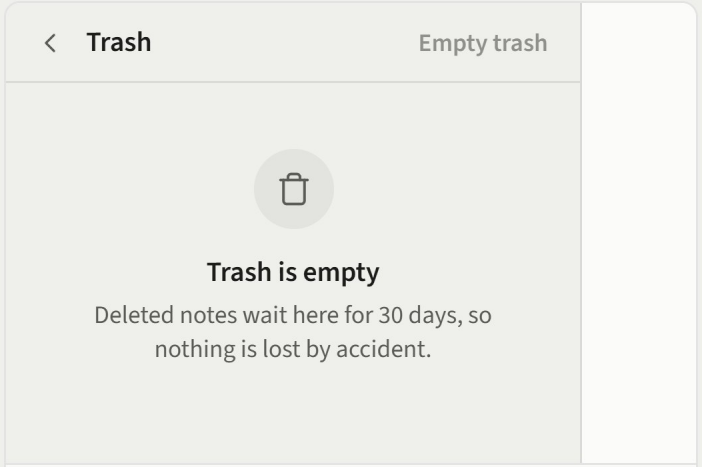

Search results
Searches every note’s text as you type. Matches are highlighted in the preview line. Esc clears the field.

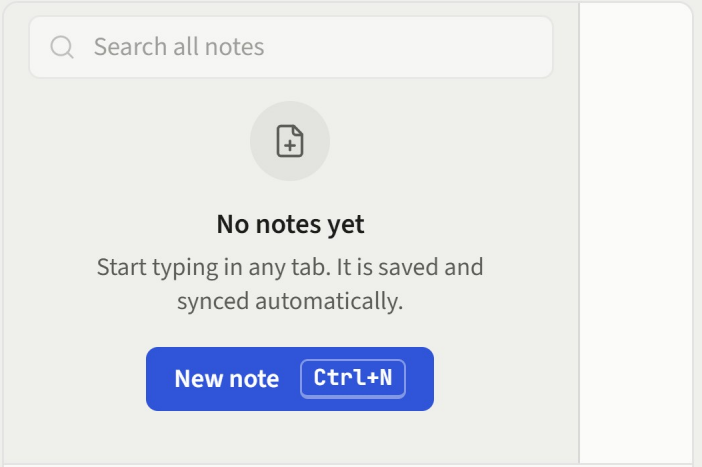

Sort menu
Three orders only. The choice is remembered per account and syncs to your other computers.

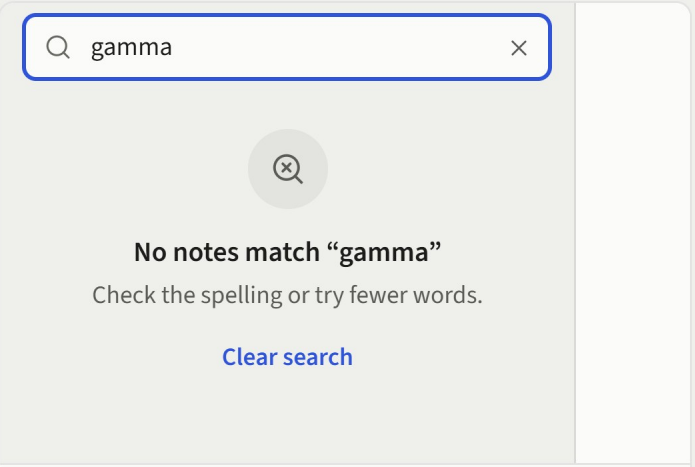

Trash
Hover or focus a row to reveal Restore and Delete forever. Restoring reopens the note in a new tab.

Empty trash
The “Empty trash” action is disabled while there is nothing to remove.

No notes yet
First sign-in on a new account. Search is disabled until there is something to search.

No results
Plain wording and one recovery action. The announcement is read by screen readers as the list updates.

Change

Color and tokens

Every screen reads from these named tokens, never from raw values, so a theme is simply a second set of values. Each token is named by role and the canvas CSS variable carries the same name. Swatches show the real value over that theme's own surface, which is why translucent tokens look soft.

Surfaces & text

Three flat layers and three text levels. **chrome** frames the app (title bar, tab strip, sidebar). **surface** holds the writing and the selected tab. **raised** floats above: menus, dialogs, cards. **text-3** is the quietest text that still passes AA.

Light			Dark		
chrome #EFEFEC	surface #FBFBFA	raised #FFFFFF	chrome #252527	surface #1B1B1D	raised #2B2B2E
text #1D1D1B	text-2 #5B5B57	text-3 #686863	text #E8E7E3	text-2 #A8A7A2	text-3 #92918C

Interaction

Translucent ink laid over any surface, so one set works everywhere. **hover** and **press** tint buttons and rows, **sep** divides tabs, **line** draws card edges, **line-2** draws control outlines.

Light			Dark		
hover #1D1D1B · 6%	press #1D1D1B · 10%	sep #1D1D1B · 16%	hover #FFFFFF · 7%	press #FFFFFF · 11%	sep #FFFFFF · 16%
line #1D1D1B · 10%	line-2 #1D1D1B · 26%		line #FFFFFF · 9%	line-2 #FFFFFF · 22%	

Accent

One blue, used sparingly: primary button, focus ring, selected row, links and the active-section marker. The dark theme lifts it so it stays legible.

Light			Dark		
accent #3055D8	accent-h #2647BD	accent-p #1F3B9E	accent #8CA2FF	accent-h #A3B5FF	accent-p #7389EA
accent-soft #E6ECFC	on-accent #FFFFFF		accent-soft #8CA2FF · 16%	on-accent #0B1230	

Editor & identity

Text selection, the current-line wash, find matches (the current match is stronger), and the account avatar.

Light			Dark		
sel #3055D8 · 18%	cur-line #1D1D1B · 4%	match #F0B928 · 40%	sel #8CA2FF · 30%	cur-line #FFFFFF · 4%	match #F0BE3C · 34%
match-cur #F09614 · 72%	avatar-bg #DCE3FB	avatar-fg #273C99	match-cur #F0A028 · 60%	avatar-bg #33406F	avatar-fg #D5DEFF

Status

Synced, needs attention, error. **add** and **del** tint conflict-diff lines only. Status is never color alone: every state also carries an icon and a word.

Light			Dark		
ok #26704A	ok-soft #E3F2EA	warn #8F5200	ok #6FCB95	ok-soft #6FCB95 · 14%	warn #EDB75A
warn-soft #FBEFD5	err #B3261E	err-soft #FBE5E3	warn-soft #EDB75A · 14%	err #FF8F86	err-soft #FF8F86 · 14%
add #289655 · 16%	del #C8372D · 14%		add #5AC882 · 18%	del #FF6E64 · 18%	

Syntax

Used only when a note is recognized as code (JSON, Markdown, config files). Plain text stays one color.

Light			Dark		
s-key #2B5FAE	s-str #2A7A4B	s-num #A8530F	s-key #8DB4FF	s-str #8FD1A5	s-num #F0B27A
s-lit #8A3FA8	s-punc #75756F	s-com #75756F	s-lit #C9A0F0	s-punc #8D8C87	s-com #8A8984

Contrast

Every text pair meets WCAG 2.1 AA (4.5:1). Status colors on their own soft fills measure 5.2:1 to 7.1:1. Large editor text and icons have more room still.

Light		Dark	
text on surface	16.3:1	text on surface	13.9:1
text-2 on surface	6.6:1	text-2 on surface	7.1:1
text-3 on surface	5.4:1	text-3 on surface	5.5:1
text-3 on chrome	4.9:1	text-3 on chrome	4.9:1
accent on surface	5.9:1	accent on surface	7.2:1
on-accent on accent	6.2:1	on-accent on accent	7.6:1

Type, spacing, radii and metrics

All sizes are in pixels at 100% scale. Spacing follows a 4 px base. The canvas uses stand-in fonts, so keep the sizes and line heights when the production fonts go in and check the optical size on the first build.

Window chrome

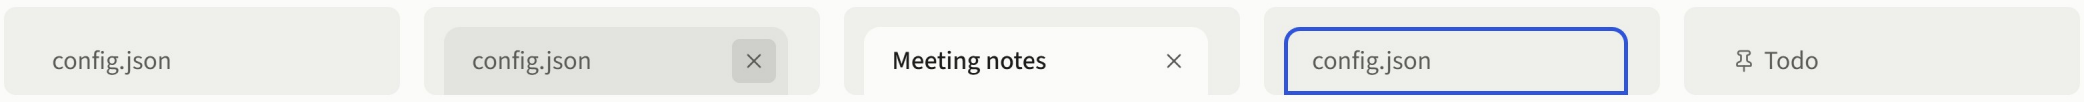

The title bar, tab strip and status bar are the only permanent chrome. They carry the whole app, so every element earns its place.

TITLE BAR AND TAB STRIP

1. **App mark**
   18 px logo with the name at 12 / 600. Part of the drag area.
2. **Pinned tab**
   104 px wide with a pin icon. No close button.
3. **Tab**
   34 px tall, 96 to 172 px wide, top corners 8. The selected tab shares the editor's surface so it reads as attached.
4. **New note**
   30 × 30. Ctrl+N does the same. Opens an untitled tab at the end.
5. **Drag area**
   Everything that is not a control moves the window. Double-click maximizes.
6. **Account**
   28 px circle, initials or Google photo. Opens the account menu.
7. **Window controls**
   46 × 40 each. Close turns red on hover.

TAB STATES

Default
Title in text-2. Close button appears on hover.

Hover
Hover wash. Close button shows; its own hover adds a second wash.

Selected
Same surface as the editor, text at 500 weight, close always visible.

Keyboard focus
2 px accent ring, inset. Arrow keys move it; Enter or Space selects.

Pinned
104 px, pin icon, no close button. Always sits at the left edge.

Waiting to sync
Accent dot replaces the close icon until saved. Close shows on hover.

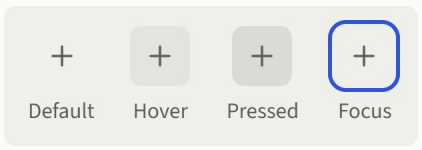

Conflict
Amber dot. Opens the resolution dialog on click.

Loading
Title known, text still arriving. Muted title with a spinner.

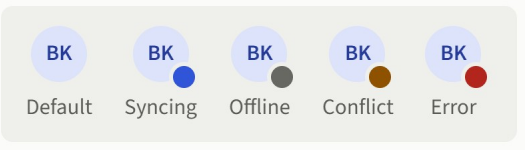

Renaming
F2 or double-click. Text is preselected. Enter saves, Esc cancels.

Dragging
Lifted with a flyout shadow. An accent marker shows where it will land.

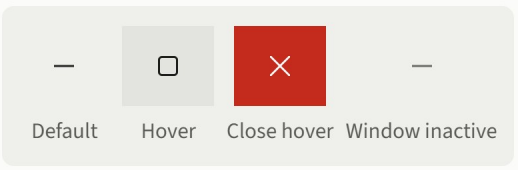

NEW-NOTE BUTTON

ACCOUNT AVATAR

WINDOW CONTROLS

SCROLLBAR

STATUS BAR, 24 PX

1. **Sidebar toggle**
   Ctrl+B. Highlighted while the sidebar is open.
2. **Position**
   Ln, Col. With a selection: "13 selected".
3. **Count**
   Characters, or words when asked.
4. **Encoding**
   Opens a short menu. Hover wash shown.
5. **Mode**
   Plain Text, JSON, Markdown. Detected, changeable.
6. **Zoom**
   Click to reset to 100%. Ctrl + wheel changes it.
7. **Sync**
   Opens the sync popover. See Sync states.

Controls and surfaces

The same small kit builds every screen. Controls are 32 px tall (26 for inline actions, 44 for the one welcome button), radius 6. Surfaces that float use radius 8 and a shadow. Nothing is decorated beyond that.

TOASTS

Closed “packing-list.md” Undo Ctrl+Shift+T

Restored 5 notes from your other computer

Toast. Bottom-left of the editor, raised surface, auto-dismiss in 6 s. Pauses while hovered or focused.

BANNERS

Offline. Saved on this computer and will sync when you’re back.

“Meeting notes” changed on two computers. Resolve

Sync paused. Your notes are safe here. Retry

Banner. Sits under the tab strip, 36 px minimum, one action at most. Dismisses itself when the cause clears.

DIALOG

Sign out of NimPad?

Your notes stay in your Google account. They’ll be removed from this computer.

Cancel Sign out

Dialog. 8 radius, dialog shadow over a scrim. Focus starts on the safe action. Esc cancels, Enter confirms the primary.

Interaction states

Every interactive part has the same six states in both themes. A dash means the state does not apply to that part.

Light

	DEFAULT	HOVER	PRESSED	FOCUSED	SELECTED / ON	DISABLED
Primary button accent → accent-h → accent-p	Sync now	Sync now	Sync now	Sync now	–	Sync now
Secondary button hover → press, plus a 1 px inset	SYNC NOW	SYNC NOW	SYNC NOW	SYNC NOW	–	SYNC NOW
Icon button 28 px, toggles use accent-soft						
Text field border line-2 → text-3 → accent	Replace with	Replace with	–	preview	–	Replace with
Switch knob widens while pressed						
Tab selected shares the editor surface	config.json	config.json	config.json	config.json	Meeting notes	–
Note row selected uses accent-soft	**Meeting n…** 2:14 PM	**Meeting n…** 2:14 PM	**Meeting n…** 2:14 PM	**Meeting n…** 2:14 PM	**Meeting n…** 2:14 PM	–
Menu item 32 px, radius 4	Rename	Rename	Rename	Rename	Last edited	Rename

Secondary button hover → press, plus a 1 px inset	SYNC NOW	SYNC NOW	SYNC NOW	SYNC NOW	–	SYNC NOW
Icon button 28 px, toggles use accent-soft						
Text field border line-2 → text-3 → accent	Replace with	Replace with	–	preview	–	Replace with
Switch knob widens while pressed						
Tab selected shares the editor surface	config.json	config.json	config.json	config.json	Meeting notes	–
Note row selected uses accent-soft	**Meeting n…** 2:14 PM	**Meeting n…** 2:14 PM	**Meeting n…** 2:14 PM	**Meeting n…** 2:14 PM	**Meeting n…** 2:14 PM	–
Menu item 32 px, radius 4	Rename	Rename	Rename	Rename	Last edited	Rename
Settings nav item selected adds a 3 px accent bar	Appearance	Appearance	Appearance	Appearance	**Appearance**	–

Hover
A translucent wash (6 to 7%). The primary button steps to accent-h.

Pressed
Stronger wash (10 to 11%). The primary button steps to accent-p. Nothing moves.

Focused
2 px accent ring. Outside, 2 px offset, on standalone controls. Inside on rows, tabs and menu items.

Selected
Meaning changes by part: surface for tabs, accent-soft for rows, an accent bar for navigation, accent fill for switches.

Disabled
40 to 45% opacity, no hover, not focusable. Always paired with a reason nearby when it is not obvious.

Keyboard interaction

Everything works without a mouse. Shortcuts follow Windows and Notepad++ habits wherever there is one. Each part has one tab stop, and arrow keys move inside it.

Moving around

Four regions: tab strip, editor, sidebar, status bar.

F6 / Shift F6	Next or previous region
Tab / Shift Tab	Next or previous control inside a region
Ctrl Tab / Ctrl Shift Tab	Next or previous note tab, from anywhere
Ctrl Alt N	Bring NimPad to the front from any app
Alt F4	Close the window

In the editor, Tab types a tab character. F6 and Ctrl+Tab are the ways out, so the keyboard is never trapped.

Tab strip

One tab stop. Arrow keys move inside it.

← / →	Previous or next tab, selected as focus lands
Home / End	First or last tab
Enter	Send focus to the editor
F2	Rename the tab
Delete / Ctrl W	Close the tab; Undo toast appears
Ctrl Shift ← / Ctrl Shift →	Move the tab left or right
Menu / Shift F10	Open the tab menu
Ctrl Shift T	Reopen the last closed tab
Ctrl N	New untitled note at the end

Sign-in

Enter / Space	“Continue with Google” holds focus on launch
Esc	Cancel while waiting for the browser
Tab	Moves on to Privacy and Terms

Editor

Everything else is ordinary text editing.

Ctrl Z / Ctrl Shift Z	Undo or redo
Ctrl F / Ctrl H	Find or replace
Ctrl Plus / Ctrl Minus	Zoom in or out
Ctrl 0	Reset zoom to 100%
Ctrl S	Export the note as a file
Tab / Shift Tab	Indent or outdent the selection
Ctrl B	Show or hide the notes sidebar

Find and replace

Floating panel, top right of the editor.

Ctrl F	Open and focus Find, filled from the selection
Ctrl H	Open and focus Replace
Enter / Shift Enter	Next or previous match
Alt C / Alt W / Alt R	Match case, whole word, regex
Enter	In Replace: replace this match
Ctrl Enter	In Replace: replace all
Esc	Close; focus returns to the editor with the match selected

Tab order: Find, three options, previous, next, Replace, Replace, Replace all, Close.

Settings

Opens in its own small window.

Ctrl ,	Open settings. Esc closes.

Notes sidebar

Ctrl+B opens it with focus in the search field.

↓	From search into the list
↑ / ↓	Move through notes. Home and End jump.
Enter	Open the note, or switch to its tab if open
F2	Rename the focused note
Delete	Move to Trash; Undo toast appears
Esc	Clear search; again to return to the editor
Ctrl B	Close the sidebar and return to the editor
Enter	In Trash: restore the note
Delete	In Trash: delete forever, after a confirmation

Menus, dialogs, toasts

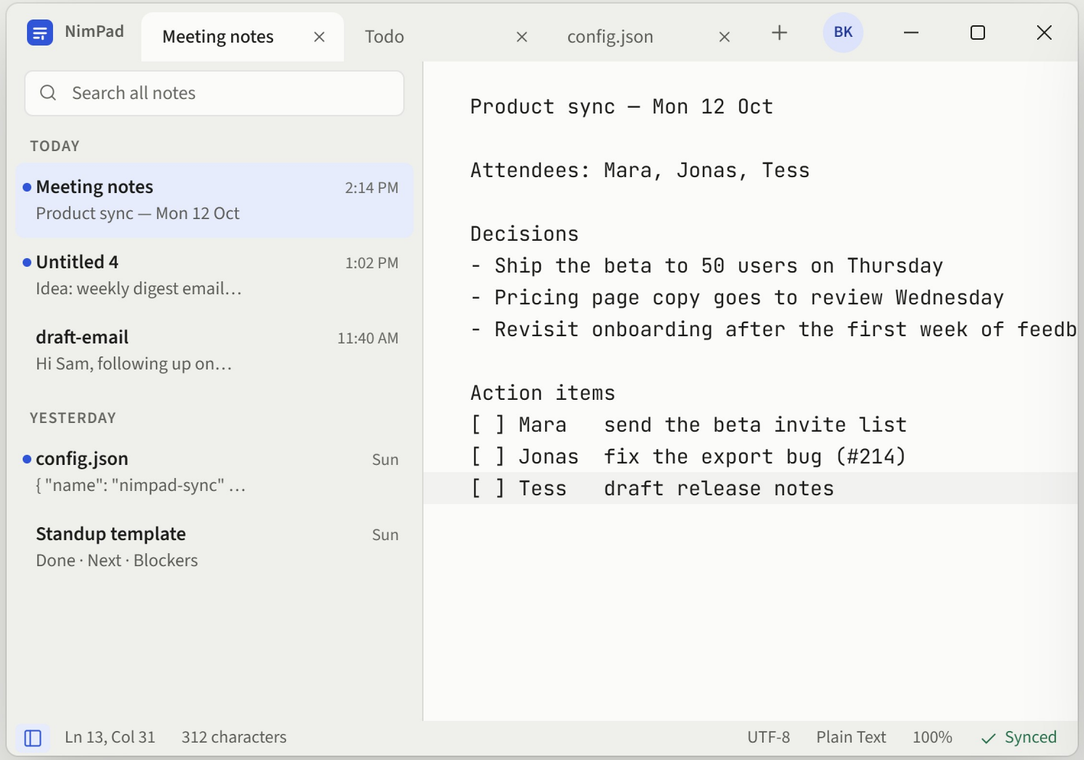

↑ / ↓	Move in a menu. Enter or Space runs, Esc closes and returns focus.
Tab / Shift Tab	Cycle inside a dialog. Focus never leaves it.
Esc	Cancel a dialog. Enter confirms its primary button.
← / →	Switch the Side by side and Changes only views in the conflict dialog

Dialogs open on their safest button. Toasts never take focus; the action shows its own shortcut.

Responsive window sizes

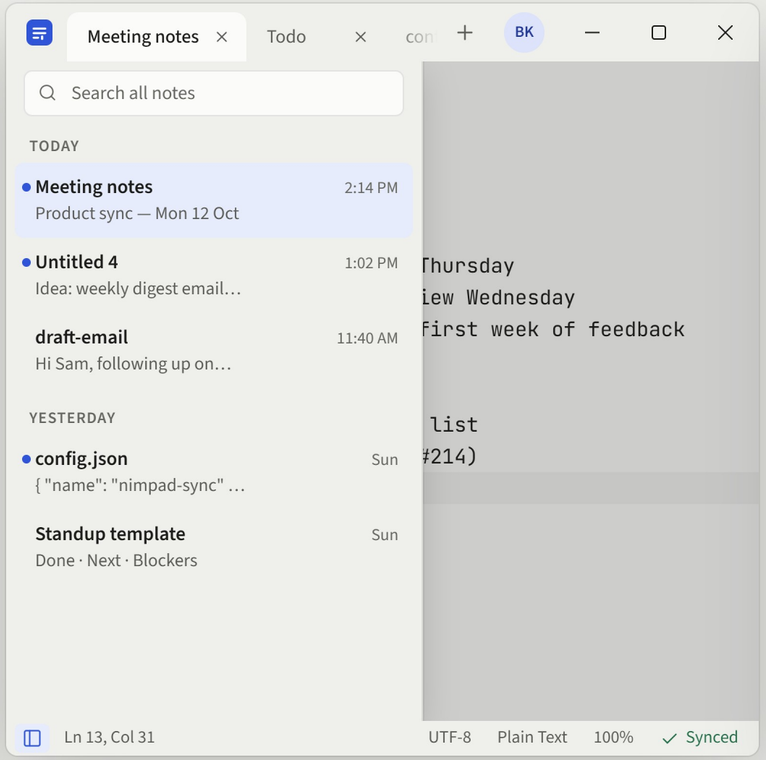

NimPad is a resizable window, not a responsive page, so there are three layouts. Each is drawn here at its true pixel size. The minimum window is 400 × 300, and the writing area always keeps priority over chrome.

Wide `720 px and up`

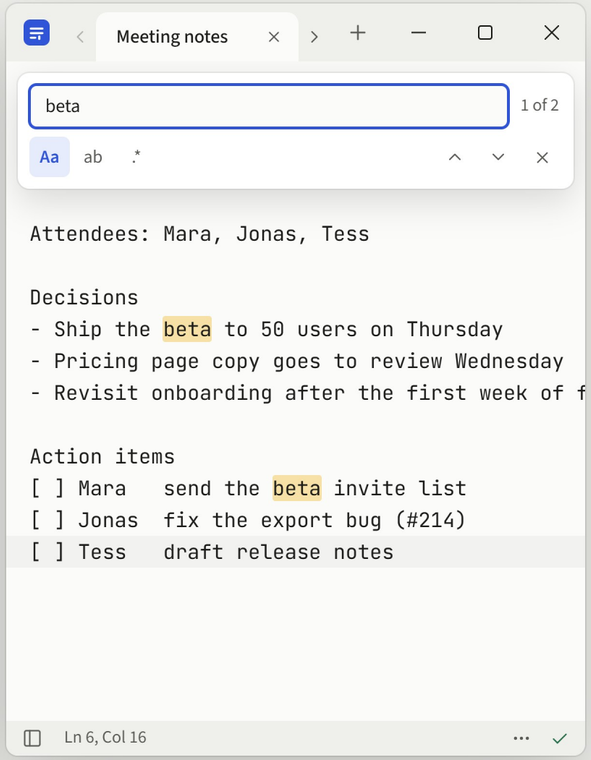

- Everything shown. The sidebar docks beside the editor and keeps 288 px.
- Editor padding 20 / 32. Tabs shrink from 172 toward 96 before they scroll.

Medium `520 to 719 px`

- App name hides. Sidebar overlays the editor instead of pushing it; Esc or a click outside closes it.
- Editor padding 20 / 24. Character count leaves the status bar.

Narrow `400 to 519 px, the minimum`

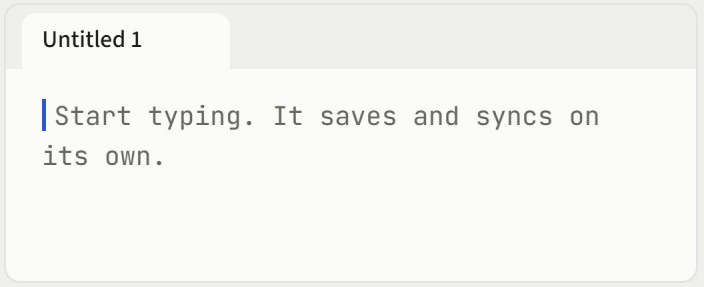

- Tabs scroll with chevrons and the account moves into the sync popover.
- Status bar keeps position and sync. A ⋯ menu holds encoding, mode and zoom. Find spans the full width.

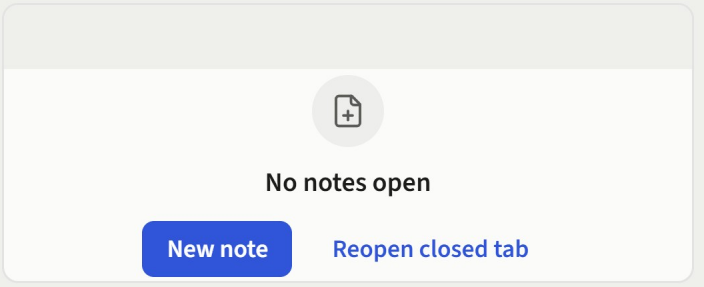

Empty and loading states

Empty states say one plain thing and offer at most one action. Loading states keep the final layout in place and never block typing.

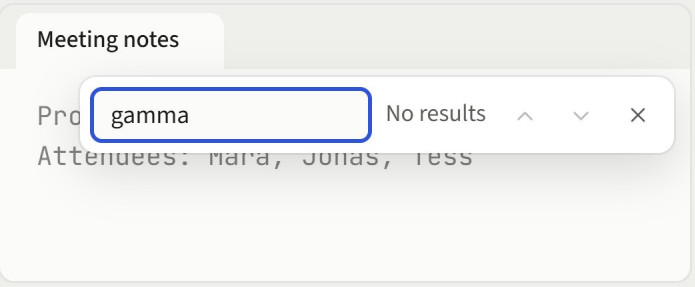

EMPTY

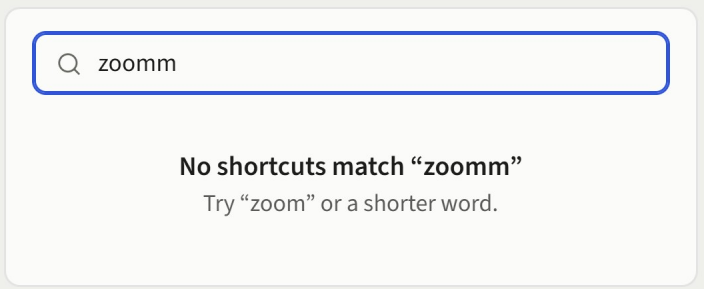

New empty note
A hint, not a screen. It vanishes on the first keystroke and is never saved.

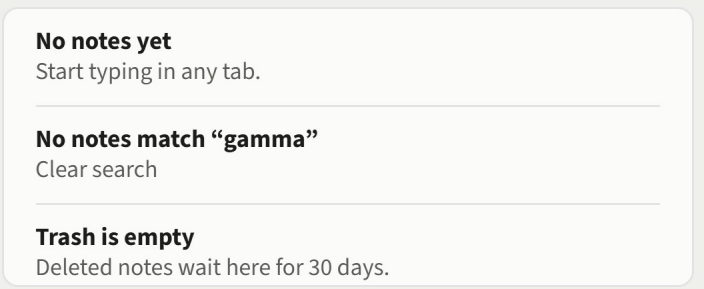

All tabs closed
Shown after the last tab closes. Never blocks the window or asks anything.

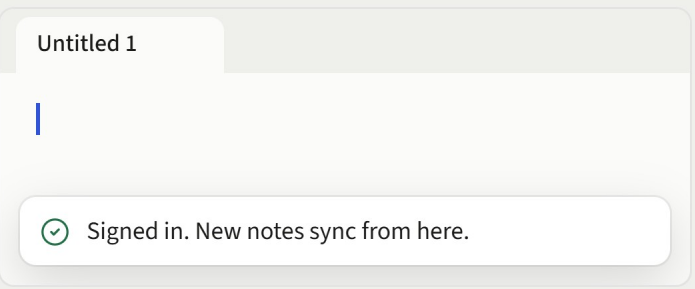

Find: no matches
Count says so in words. Previous and next dim. Nothing else changes.

Shortcuts: no match
Plain wording and the way out. The list returns as the field is cleared.

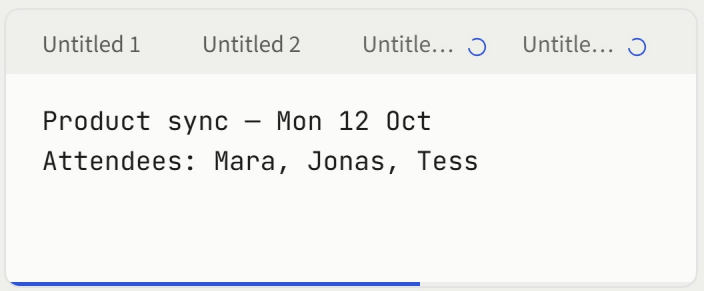

Sidebar: three cases
Each has one sentence and, where it helps, one action. See Sidebar states.

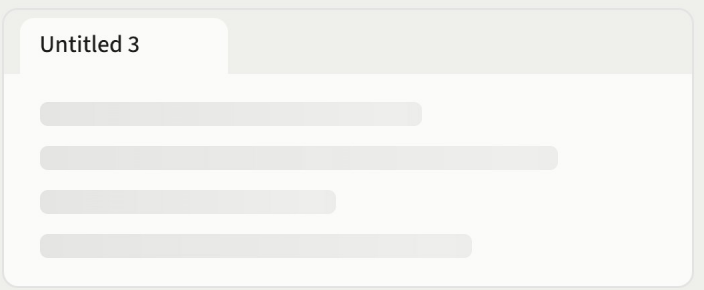

Brand-new account
Signed in, nothing to restore. A single toast and an empty note, no tour.

LOADING

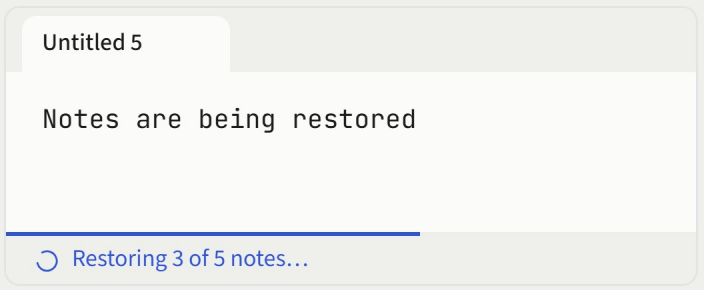

Tabs restoring
Tabs appear first, in order. Titles are known; text arrives per tab.

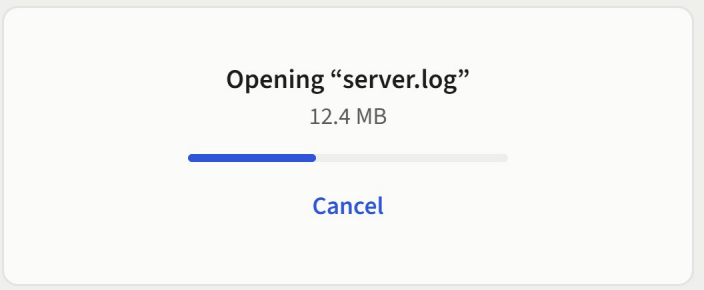

Note body loading
Only when text takes over 300 ms. Typing is allowed once it lands.

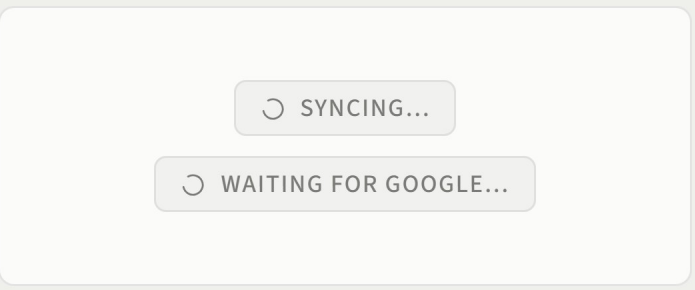

Sidebar list loading
Rows keep their final height, so nothing jumps when data arrives.

Sync progress
Status bar says what is happening with a count. Click opens the popover.

Large note opening
Over 5 MB only. Determinate progress and a way to cancel.

Busy buttons
Label changes to the verb, a spinner appears, the button disables. Width stays.

TIMING

`0 to 300 ms`	`300 to 600 ms`	`After 600 ms`	`Over 2 s`
Show nothing. Most work finishes here and a flash would only distract.	Placeholders keep their final size: skeleton lines or rows.	A spinner appears in the place the result will land.	Say what is happening with a count or a percentage, and offer Cancel when it is safe.
